

**CTTR, Subscription C, volume 5
September, 2011 – May, 2012
Abbreviated File Diagnoses**

Subscription C: September, 2011

- Case 1: Angiomyolipoma, kidney
- Case 2: Angiomyoma, palm
- Case 3: Cutaneous leiomyoma (Piloleiomyoma), leg
- Case 4: Cutaneous leiomyosarcoma, forearm
- Case 5: Leiomyoma, esophagus
- Case 6: Leiomyomata, uterus
- Case 7: Degenerating leiomyoma, uterus
- Case 8: Atypical ("symplastic") leiomyoma, uterus
- Case 9: Epithelioid leiomyosarcoma of uterus, omentum
- Case 10: Epithelioid leiomyoma, stomach

Subscription C: October, 2011

- Case 1: Osteochondroma, femur
- Case 2: Aneurysmal bone cyst, cuboid bone
- Case 3: Fibrocartilaginous dysplasia, femur
- Case 4: Giant cell tumor, left radius bone
- Case 5 (as published at www.cttr.org as COTM, Vol 12(7), April 2010): Gorlin Cyst, mandible
- Case 6: Ossifying fibromyxoid tumor, hand
- Case 7: Undifferentiated malignant neoplasm, favor epithelial origin, bone
- Case 8: Myxoid chondrosarcoma, ribs and abdomen
- Case 9: Extra-skeletal myxoid chondrosarcoma, thigh
- Case 10: Multiple myeloma, humerus

Subscription C: November, 2011

- Case 1: Tattoo granuloma, ankle
- Case 2: Herpes simplex, inguinal skin
- Case 3: Keloid, deltoid region
- Case 4: Hidradenoma papilliferum, vulva
- Case 5: Cutaneous Leiomyomata, arms and trunk
- Case 6: Deep granuloma granulare (GA), chest
- Case 7: Pleomorphic fibroma, shin
- Case 8: Spitz Nevus
- Case 9: Mycosis fungoides, thigh
- Case 10: Nodular fasciitis, face

Subscription C: January, 2012

- Case 1: Cardiac rhabdomyoma
- Case 2: Fetal rhabdomyoma, face
- Case 3: Embryonal rhabdomyosarcoma, botryoid type
- Case 4: Embryonal rhabdomyosarcoma, bladder
- Case 5: Alveolar rhabdomyosarcoma, paranasal sinuses
- Case 6: Embryonal rhabdomyosarcoma, paratesticular
- Case 7: Pleomorphic rhabdomyosarcoma, shoulder
- Case 8: Embryonal rhabdomyosarcoma, perianal
- Case 9: Alveolar rhabdomyosarcoma, thigh
- Case 10: Pleomorphic rhabdomyosarcoma with pseudo-lipoblasts, scrotum

Subscription C: February, 2012

- Case 1: Nodular fasciitis, arm
- Case 2: Ischemic fasciitis, region of hip
- Case 3: Elastofibroma, gluteal fold
- Case 4: Gardner Fibroma (cannot totally exclude SFT), region of thyroid
- Case 5: Fibroma of tendon sheath, knee
- Case 6: Mesenteric fibromatosis, para-uterine
- Case 7: Hyaline fibromatosis, elbow
- Case 8: Myofibroma (Myopericytoma), thigh
- Case 9: Proliferative myositis, upper arm
- Case 10 (case published as CTTR's COTM March, 2009, vol 11(6), www.cttr.org): Low-Grade Fibromyxoid Sarcoma With Hyalinizing Giant Rosettes

Subscription C: March, 2012

- Case 1: Esophagitis dissecans superficialis
- Case 2: Eosinophilic esophagitis
- Case 3: Barrett esophagus with dysplasia
- Case 4: Burkitt lymphoma of stomach, post-Helicobacter pylori
- Case 5: Peutz-Jeghers hamartomatous polyp, duodenum
- Case 6: Angiosarcoma, liver
- Case 7: Colonic lipoma, transverse colon
- Case 8: T-cell lymphoma with aberrant loss of expression of CD5, duodenum
- Case 9: Lymphoepithelioma-like adenocarcinoma, colon
- Case 10: Adenocarcinoma, distal portion of appendix

Subscription C: April, 2012

- Case 1:: Atypical endometrial hyperplasia with atypia
- Case 2: Dysgerminoma, Ovary
- Case 3: Adult Granulosa Cell Tumor, Ovary
- Case 4: Mucinous Tumor with Borderline Change, Ovary

Case 5: Papillary Serous Cystadenoma with Borderline Features (Low Malignant Potential)
Case 6: Low Grade Steroid cell tumor, ovary, NOS
Case 7: Pheochromocytoma, left adrenal gland, Clear Cell Carcinoma, left ovary
Case 8: Small cell carcinoma of ovary, hypercalcemic type
Case 9: Choriocarcinoma, Ovary
Case 10: Endometroid Ca of Oviduct

Subscription C: May, 2012

Case 1: Fibrous Hamartoma, arm
Case 2: Infantile myofibroma
Case 3: Congenital mesoblastic nephroma, mixed pattern, predominantly classic type
Case 4: Wilms tumor, kidney
Case 5: Wilms tumor with diffuse anaplasia
Case 6: Clear Cell Sarcoma of Kidney
Case 7: Myofibroblastic Sarcoma of Mouth
Case 8: Neuroblastoma, differentiating subtype with low mitotic-karyorrhectic index
Case 9: Embryonal Rhabdomyosarcoma
Case 10: Malignant rhabdoid tumor, extra-renal
